Detailed Requirements (baselined version)

1 When the user clicks a bucket name in the bucket list, the user shall be directed to said bucket's page. This bucket name shall hereafter be referred to as the *bucket name*, and this page shall hereafter be referred to as the *bucket page*.

   1.1   The bucket page shall display a *bucket title*.

      1.1.1   The bucket title shall be displayed at the top of the bucket page.

      1.1.2   The text of the bucket title shall be "≪bucket name≫ Bucket."

   1.2   The bucket page shall display a *drip list*.

      1.2.1   A drip shall belong in the drip list if said drip's `bucketNames` array contains the bucket name. This containment check shall be performed in a case-sensitive manner.

      1.2.2   Drips belonging in the drip list as per Section 1.2.1 shall be listed in reverse chronological order[1].

---

[1]That is, the more recent drips shall be displayed at the top.
